

DustPro™

Industrial Air Filters

Ideal for industrial equipment cooling and fuel air applications, DustPro panels lead the industry in efficiency and dirt holding capacity. All models utilize pleated cellulose filter media, providing superior application flexibility. Manufactured with heavy duty corrosion resistant steel frames, DustPro panels withstand vibration and the heavy work load generated by industrial air cooled and air fueled equipment.

THE BOTTOM LINE

- The Choice is Yours**
 PECOFacet is an industry leader in air filtration products. Don't get locked into a single source. Adding PECOFacet to the supplier list for all your air filtration needs will ensure your access to the best products at competitive prices. Performance and structural integrity are backed by a no-nonsense factory warranty. Send us the manufacturer model number and we'll do the rest.

ASHRAE TEST STANDARD 52.1 - 1992

- Available on certain models.**
 Consult customer service for additional information.

APPLICATIONS

Cooling and fuel air for industrial equipment such as:

- Engines
- Compressors
- Blowers
- Turbines

SPECIFICATIONS

MATERIALS

- FILTER MEDIA** phenolic impregnated pleated cellulose
- MEDIA SUPPORT** steel (galvanized or tin plated)
- FRAME** 26 gage steel (galvanized or tin plated)
- GASKET** foam rubber

OPERATING DATA

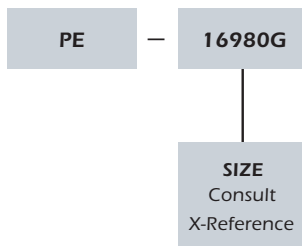

Max. Temp. [F]	Max. D.P. ¹ [psid]	Efficiency [µm]
250	Per Model	Per Model

- ¹Recommended change-out DP depends on model
- Normal flow direction is outside to inside

REPLACEMENT OPTION FOR

- Air Refiner
- American Air
- Caterpillar
- Dollinger
- Donaldson
- Farr
- Fleetguard
- Nelson-Winslow
- Royal
- Waukesha
- Wix
- Others
